

Sygnia Enhanced Income Fund

Fund Class A

A low- to medium-risk interest-earning portfolio, managed on a multi-manager basis

Risk profile

Low

Low-Medium

Medium

Medium-High

High

Investment objective and strategy

The objective of the Sygnia Enhanced Income Fund is to outperform the returns on cash at a low level of volatility. This multi-asset portfolio's primary objective is to produce a stable income stream by investing in a wide spread of income-bearing investments in the equity, bond, money market and real estate markets. By bridging the gap between money market and bond funds, investors gain access to term premium without having to take on interest rate risk. The fund is multi-management, which is a new development in the income space. The fund appoints external managers who are mandated to assist in achieving the portfolio's objectives, while internal management of overall risk ensures diversification limits are always in place. This combination provides enhanced yield with reduced risk at lower cost. The fund is managed within prudential guidelines and maintains a maximum 10% equity exposure. Derivatives are allowed for efficient portfolio management.

Risk profile

The fund is strategically managed to achieve attractive returns while protecting capital. The fund risk is managed by spreading investments across sectors and individual issuers.

What the fund invests in

Asset class	Percentage	Allocation
Domestic Bonds	72.2	<div></div>
Domestic Money Market	19.4	<div></div>
International Fixed Interest	7.6	<div></div>
International Cash	0.9	<div></div>

Who should invest?

Investors seeking currency diversification and higher returns who are willing to tolerate higher volatility and aim to maximise capital accumulation over a longer-term time horizon.

Minimum investment period
2 years

Disclosures
Sygnia does not provide advice and therefore does not charge advice fees. If a financial planner is appointed, initial and ongoing advice fees may be payable as agreed upon between you and your financial advisor. The payments of these fees are facilitated by the linked investment service provider (LISP) and not directly by Sygnia. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction costs are a necessary cost in administering the financial product and impact financial product returns. They should not be considered in isolation, as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

Disclaimer
The Sygnia Group is a member of the Association for Savings and Investment SA. Sygnia Collective Investments RF (Pty) Ltd is a registered and approved anager in collective investment schemes in securities. Collective investment schemes are generally medium- to long-term investments. Sygnia Asset Management (Pty) Limited (FSP 873), an authorised financial services provider, is the appointed investment manager of the Fund. The portfolio may invest in other unit trust portfolios that levy their own fees, which may result in a higher fee structure. The value of investments/units/unit trusts may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available from the manager on request. Performance is based on NAV-to-NAV calculations, with income reinvestments done on the ex-div date. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, actual investment date, date of reinvestment and dividend withholding tax. The manager does not provide any guarantee with respect to either the capital or the return of a portfolio. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio, including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Forward pricing is used. All the portfolio options presented are approved collective investment schemes in terms of the Collective Investment Schemes Control Act, no. 45 of 2002. The fund may from time to time invest in foreign countries and may therefore have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement and the availability of information. The manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates.
