Investment objective and strategy

The objective of the Sygnia Itrix Health Innovation Actively Managed ETF is to provide an investment vehicle that gives easy access to investors who want to achieve long-term capital appreciation by gaining exposure to companies positioned at the forefront of healthcare innovation and new technologies. These transformative technologies focus on advancement in healthcare, digital health, and biotech among others. The Sygnia Itrix Health Innovation fund is a high-risk, actively managed exchange traded fund, registered as a collective investments scheme, and is listed on the Johannesburg Stock Exchange.

Risk profile

The fund has a 100% strategic allocation to global equities. The risk in the fund is managed by spreading investments across countries and individual shares, but the structure of the fund is dictated by the largest healthcare innovation companies. The focus on the largest, more liquid companies provides an added benefit in terms of risk management.
