Investment objective and strategy

The objective of the Sygnia Itrix MSCI China Feeder ETF is to provide an investment vehicle for investors wishing to track the movement of the MSCI China Index in ZAR by investing in the iShares MSCI China UCITS ETF (“underlying fund”) securities. The investment objective of the iShares MSCI China UCITS ETF is to deliver the net total return performance of the MSCI China Index, less the fees and expenses of the fund. In order to achieve this, the investment policy of the iShares MSCI China UCITS ETF is to invest in a portfolio of equity securities that as far as possible and practicable consists of the component securities of the MSCI China Index. Investors should note that the performance reconciliation between the Sygnia Itrix MSCI China Feeder ETF and the underlying feeder fund will be affected by, but not limited to, exchange timing, pricing methodology and domestic and international public holidays.

Risk profile

The fund has a 100% strategic allocation to global equities. The risk in the fund is managed by spreading investments across sectors and individual shares, but the structure of the fund is dictated by the composition of the MSCI China Index.

| International Equity | 100.0 | <div style="width: 100%; height: 10px; background-color: #667788; margin-bottom: 5px;"></div> <div style="width: 100%; height: 10px; background-color: #667788;"></div> |

Who should invest?

It is a suitable investment for investors seeking higher returns, those willing to tolerate higher volatility and those aiming to maximise capital accumulation over the longer term. The investment is also suitable for investors who wish to maximise their returns in the most cost-effective manner without having to select asset managers or take on the risk of active and subjective investment decision-making processes.

Fees

| | |
|-----------------------------|-------------------------------|
| Annual management fee | 0.17% p.a. (excl. VAT) |
| Other expenses | 0.27% (excl. VAT) |
| VAT | 0.06% |
| Total expense ratio (TER) | 0.51% (Dec 2025) |
| Transaction costs (TC) | 0.14% (Dec 2025) |
| Total investment cost (TIC) | 0.65% (Dec 2025) |

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. TCs are a necessary cost in administering the financial product and impact financial product returns. TCs should not be considered in isolation, as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

With effect from 11 December 2024, Sygnia Itrix New China Secotrs ETF was, via a ballot, changed to a feeder ETF with the benchmark of the MSCI China Index.
