Investment objective and strategy

The objective of this Sygnia Itrix Top 40 ETF is to provide simple access to investors who wish to track the movements of the benchmark FTSE/JSE Top 40 Index by investing in its constituent index securities. The FTSE/JSE TOP 40 Index consists of the largest 40 companies listed on the JSE, ranked by investable market capitalisation in the FTSE/ JSE All-Share Index. The objective of this high-risk, passively managed index-tracking fund is to provide simple access to investors who wish to track the movements of the FTSE/JSE TOP 40 Index by investing in its physical index securities. The investment policy of the portfolio is to track the index as closely as practically and feasibly possible by buying the securities in the index at a similar weighting. Whenever the index is rebalanced, the portfolio purchases the newly included constituent securities and sells the excluded securities. Derivatives are allowed for efficient portfolio management.

Risk profile

The fund has a 100% strategic allocation to local equities, but the structure of the fund is dictated by the composition of the FTSE/JSE TOP 40 Index. The fund aims to achieve its investment objective with acceptable levels of short-term volatility relative to the benchmark index.

Who should invest?

The Sygnia Itrix Top 40 ETF has a high risk profile and is designed to track the Index as closely as possible by buying the securities in the index at a similar weighting. It is a suitable investment for investors seeking higher returns, those willing to tolerate higher volatility and those aiming to maximise capital accumulation over the longer term. The investment is also suitable for investors who wish to maximise their returns in the most cost-effective manner without having to select asset managers or take on the risk of active and subjective investment decision-making processes. Given the specialist nature of the fund, it should be used as part of a diversified investment strategy rather than as a sole equity investment.
