Adherence to policy objective

An analysis of factors affecting the adherence to the policy objective is contained in the fund manager commentary. Please read this quarterly investor report in conjunction with the minimum disclosure document of the fund.

What is the Total Expense Ratio (TER) and Transaction Costs (TC)?

The total expense ratio (TER) is the annualised percentage of the fund's average assets under management that has been used to pay the fund's actual expenses over the past three years. Transaction costs are a necessary cost in administering the fund and impact fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Since fund returns are quoted after the deduction of these expenses, the TER and Transaction Costs should not be deducted again from the published returns. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return.

General disclaimer

The Sygnia Group is a full member of the Association for Savings and Investment SA. Sygnia Collective Investments RF (Pty) Ltd is a registered and approved Manager in Collective Investment Schemes in Securities in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). Sygnia Asset Management (Pty) Limited FSP (863), an authorised financial services provider, is the appointed investment manager of the Fund.

The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure and the value of investments / units / unit trusts may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available from the Manager on request. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Performance is calculated for the portfolio and the individual investor performance may differ as a result of initial fees, actual investment date, date of reinvestment and dividend withholding tax. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Forward pricing is used. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA").

The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. A copy of the Minimum Disclosure Document (MDD) is available on our website: www.sygnia.co.za
